
**Founders should
spend time
on product and sales.**

PROBLEM

Finance is central to every operational decision.

70%

of failed VC-backed startups shut down after running out of capital.

Source: CB Insights, Why Startups Fail, published March 5, 2026.

**The issue is not missing data.
The issue is fragmented action.**

Invoices live in email, budgets live in sheets, approvals live in people's heads, and reports arrive too late to change what happens next.

Founders lose time to finance ops instead of product and sales.

SOLUTION

Ontology makes operations explicit.

Items

What exists in the company.

Company · Invoice · Budget line · Cost center · Forecast · Runway

Actions

What the system can do with it.

classify · route · approve · update · report

Rules

What is allowed, and under which conditions.

Approval thresholds · ownership · escalation · compliance
